

### English

This term we will be reading space themed stories such as 'The Way Back Home', 'How to Catch a Star' and 'The Man on the Moon'. As part of this process, we will be thinking about how we could travel into space, who we might encounter there as well as what we might see and get up to! We will be engaging in role play about characters in these stories as well as recreating the stories and developing our own ones in drama, pictures and words.

### Science/DT

In science and DT this term, we will be investigating Space and using this theme to think about materials and also concepts of light and dark. We will be having a visit from Explorer Dome to introduce our space topic and they will immerse us in a tent experience revealing the wonders of the Universe and telling us the stories behind the constellations.

### P.E.

This term we will be learning how to control and move our bodies in gymnastics working towards performing rolls, jumps and balances.

### PSHCE

We will learn about keeping ourselves happy confident and healthy in 'All About Me'.

### R.E.

This term we will be thinking about God as a creator and harvest time. We will look at how Christians celebrate, giving thanks to God for everything we are provided with.

### Maths

This term's emphasis is on becoming confident with Number. Reception will enjoy outside and indoor number activities and games and songs. Year One will learn to count numbers up to 100 including multiples. They will identify and represent numbers using objects, pictures and number lines. They will also work on recognising, naming and experimenting with finding properties of 2D and 3D shapes.

## To Infinity and Beyond!

## The Earth, Solar system and Space

### Forest School

In Forest School we will be learning the 4 compass directions and making our own compass points as part of our introduction into geography and the 'Marvellous Man' map.

### Art, Drama and Music

In art we will be building a class rocket together as we explore the theme of Space. We will also be creating our own representations of planets, moons and stars using different mixed media materials. Finally, we will be creating our own self-portraits and using modelling to explore and represent different objects.

### Geography

In Geography we will be investigating the countries within the United Kingdom as well as the Capitals of these countries. We will also begin to look at seasonal weather patterns in the UK and compass directions.
