

# MATHS CALCULATION POLICY

*Rodmarton Primary School is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share the same commitment. All staff and volunteers are subject to an enhanced DBS check. Please refer to the school's Safeguarding Children Policy for more information.*

*'We have carefully considered and analysed the impact of this policy on equality and the possible implications for pupils with protected characteristics, as part of our commitment to meet the Public Sector Equality Duty requirement to have due regard to the need to eliminate discrimination, advance equality of opportunity and foster good relations.'*

Date agreed: January 2022

Date policy is due to be reviewed: Spring 2024

This calculation policy has been devised to meet requirements of the National Curriculum 2014 for the teaching and learning of mathematics, and is also designed to give pupils a consistent and smooth progression of learning in calculations across the school. Please note that early learning in number and calculation in Reception follows the 'Development Matters' EYFS document, and this calculation policy is designed to build on progressively from the content and methods established in the Early Years Foundation Stage.

## **Age stage expectations**

The calculation policy is organised according to age stage expectations as set out in the National Curriculum 2014, **however it is vital that pupils are taught according to the stage that they are currently working at**, being moved onto the next level as soon as they are ready, or working at a lower stage until they are secure enough to move on.

## **Providing a context for calculation:**

It is important that any type of calculation is given a real life context or problem solving approach to help build children's understanding of the purpose of calculation, and to help them recognise when to use certain operations and methods when faced with problems. This must be a priority within calculation lessons.

## **Choosing a calculation method:**

Children need to be taught and encouraged to use the following processes in deciding what approach they will take to a calculation, to ensure they select the most appropriate method for the numbers involved:

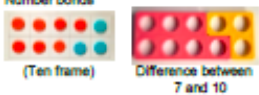

# Addition

	<b>Written Methods</b>	Read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs	Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction $\begin{array}{r} 423 \\ + 88 \\ \hline 511 \end{array}$	Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition where appropriate $\begin{array}{r} 2458 \\ + 596 \\ \hline 3054 \end{array}$	Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) $\begin{array}{r} 23454 \\ + 596 \\ \hline 24050 \end{array}$	Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	
	<b>Developing conceptual understanding</b>	<p>Number bonds</p>  <p>(Ten frame) Numicon</p> <p>Use bonds of 10 to calculate bonds of 20</p>  <p>Count all</p>  <p>Count on</p>  <p>Count on, on number track, in 1s</p> 	<p>Number track / Number line – jumps of 1 then efficient jumps using number bonds</p> <p><math>18 + 5 = 23</math></p>  <p><math>46 + 27 = 73</math> Count in tens then bridge.</p>  <p><math>25 + 29</math> by +30 then -1 (Round and adjust)</p>  <p>Partition and recombine</p> <p><math>46 + 27 = 80 + 13 = 73</math></p>  <p><math>24 + 10</math> <math>+10</math> <math>+10 = 54</math></p> 	<p>Number line: <math>264 + 158</math> efficient jumps</p>  <p><math>40 + 80 = 120</math> using <math>4 + 8 = 12</math> So <math>400 + 800 = 1200</math></p> <p><math>243 + 198</math> by +200 then -2 (Round and adjust)</p>  <p>Pairs that make 100</p> <p><math>23 + 77</math></p>  <p>Place value counters, 100s, 10s, 1s</p> <p><math>264 + 158</math></p>  <p>(Also with £, 10p and 1p)</p> 			
	<b>With jottings ... or in your head</b>	Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 + \square = 9$	Add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"><li>a two-digit number and ones</li><li>a two-digit number and tens</li><li>two two-digit numbers</li><li>adding three one-digit numbers</li></ul>	Add and subtract numbers mentally, including: <ul style="list-style-type: none"><li>a three-digit number and ones</li><li>a three-digit number and tens</li><li>a three-digit number and hundreds</li></ul>	Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	Add and subtract numbers mentally with increasingly large numbers	Perform mental calculations, including with mixed operations and large numbers
	<b>Just know it!</b>	Represent & use number bonds and related subtraction facts within 20 Add and subtract one-digit and two-digit numbers to 20, including zero	Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
	<b>Year</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>
<b>Foundations</b>	1 more	10 more Number bonds: 20, 12, 13	Add multiples of 10, 100	Add multiples of 10s, 100s, 1000s	Add multiples of 10s, 100s, 1000s, tens, hundreds	Add multiples of 10s, 100s, 1000s, tens, hundreds	
	Number bonds: 5, 6	Number bonds: 14, 15 Add 1 digit to 2 digit by bridging	Add single digit bridging through boundaries	Fluency of 2 digit + 2 digit	Fluency of 2 digit + 2 digit including with decimals	Fluency of 2 digit + 2 digit including with decimals	
	Largest number first Number bonds: 7, 8	Partition second number, add tens then ones	Partition second number to add Pairs of 100	Partition second number to add Decimal pairs of 10 and 1	Partition second number to add	Partition second number to add	
	Add 10 Number bonds: 9, 10	Add 10 and multiples Number bonds: 16 and 17	Use near doubles to add	Use near doubles to add	Use number facts, bridging and place value	Use number facts, bridging and place value	
	Ten plus ones Doubles up to 10	Doubles up to 20 and multiples of 5 Add near multiples of 10	Add near multiples of 10 and 100 by rounding and adjusting	Adjust both numbers before adding Add near multiples	Adjust numbers to add	Adjust numbers to add	
	Use number bonds of 10 to derive bonds of 11	Number bonds: 18, 19 Partition and recombine	Partition and recombine	Partition and recombine	Partition and recombine	Partition and recombine	

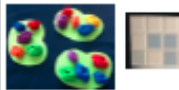

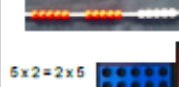

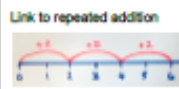

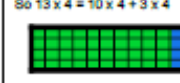

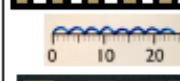

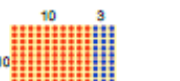

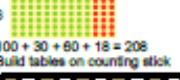

# Subtraction

Written Methods	Read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs		Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction $\begin{array}{r} 234 \\ - 187 \\ \hline 157 \end{array}$	Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition where appropriate $\begin{array}{r} 2344 \\ - 187 \\ \hline 2157 \end{array}$	Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) $\begin{array}{r} 52844 \\ - 1187 \\ \hline 51157 \end{array}$	Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
Developing conceptual understanding	<p>Number bonds</p>  <p>(Ten frame) Difference between 7 and 10</p> <p>6 less than 10 is 4</p>  <p>Count out, then count how many are left.</p> <p><math>7 - 4 = 3</math></p>  <p>Count back on a number track, then number line.</p> <p><math>15 - 6 = 9</math></p>  <p>Difference between 13 and 8 <math>13 - 8 = 5</math> <math>8 + 5 = 13</math></p>	<p>Number track / Number line – jumps of 1 then efficient jumps using number bonds <math>23 - 5 = 18</math></p>  <p>Using a number line, <math>73 - 46 = 26</math></p>  <p>Difference between 73 – 56 by counting up, <math>56 + 17 = 73</math></p>  <p>Taking away and exchanging, <math>73 - 46</math></p>  <p>Where's the forty and six?</p>  <p>Exchange to create 'sixty three'</p>  <p>Now take away the forty and six</p>	<p>Taking away and exchanging, <math>344 - 187</math></p> <p>Place value counters</p>  <p>Where's the one hundred and eighty and seven?</p>  <p>Exchange to create three hundred and thirty and fourteen. Now take away the 'seven'</p>  <p>Exchange to create two hundred, thirteen tens and seven. Now take away the 'eighty'</p>  <p>Now take away the 'one hundred'</p> 			
With jottings ... or in your head	Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 - \square = 9$	Add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> <li>a two-digit number and ones</li> <li>a two-digit number and tens</li> <li>two two-digit numbers</li> <li>adding three one-digit numbers</li> </ul>	Add and subtract numbers mentally, including: <ul style="list-style-type: none"> <li>a three-digit number and ones</li> <li>a three-digit number and tens</li> <li>a three-digit number and hundreds</li> </ul>	Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	Add and subtract numbers mentally with increasingly large numbers	Perform mental calculations, including with mixed operations and large numbers
Just know it!	Represent and use number bonds and related subtraction facts within 20 Add and subtract one-digit and two-digit numbers to 20, including zero	Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
Year	1	2	3	4	5	6
Foundations	1 less	10 less Number bonds, subtraction: 20, 12, 13	Subtract multiples of 10 and 100	Subtract multiples of 10s, 100s, 1000s	Subtract multiples of 10s, 100s, 1000s, tens	Subtract multiples of 10s, 100s, 1000s, tens, hundreds
	Number bonds, subtraction: 5, 6	Number bonds, subtraction: 14, 15 Subtract 1 digit from 2 digit by bridging	Subtract single digit by bridging through boundaries	Fluency of 2 digit - 2 digit subtraction	Fluency of 2 digit - 2 digit including with decimals	Fluency of 2 digit - 2 digit including with decimals
	Count back Number bonds, subtraction: 7, 8	Partition second number, count back in 10s then 1s	Partition second number to subtract	Partition second number to subtract Decimal subtraction from 10 or 1	Partition second number to subtract	Partition second number to subtract
	Subtract 10 Number bonds, subtraction: 9, 10	Subtract 10 and multiples of 10 Number bonds, subtraction: 16, 17	Difference between	Difference between	Difference between	Use number facts bridging and place value
	Tens subtract 10	Subtract near multiples of 10	Subtract near multiples of 10 and 100 by rounding and adjusting	Subtract near multiples by rounding and adjusting	Adjust numbers to subtract	Adjust numbers to subtract
	Difference between	Difference between Number bonds, subtraction: 18, 19	Difference between	Difference between	Difference between	Difference between

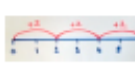

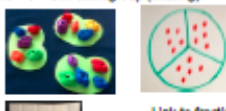

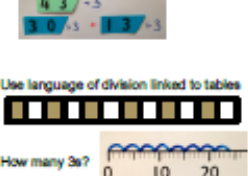

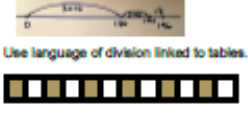

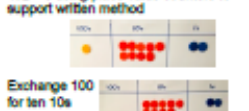

# Multiplication

Written Methods		Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (x), division (÷) and equals (=) signs	Write and calculate mathematical statements for ÷ using the x tables they know progressing to formal written methods.	Multiply two-digit and three-digit numbers by a one-digit number using formal written layout	$\begin{array}{r} 243 \\ \times 6 \\ \hline 1458 \\ 1 \end{array}$	Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers	$\begin{array}{r} 243 \\ \times 36 \\ \hline 1458 \\ 7290 \\ \hline 8748 \\ 1 \end{array}$	Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication	$\begin{array}{r} 5172 \\ \times 38 \\ \hline 41376 \\ + 155160 \\ \hline 196536 \\ 1 \end{array}$															
Developing conceptual understanding	2 frogs on each lily pad.    	5 frogs on each lily pad $5 \times 3 = 15$  $5 \times 2 = 2 \times 5$  Build tables on counting stick  Link to repeated addition 	If I know $10 \times 8 = 80$ then ...  So $13 \times 4 = 10 \times 4 + 3 \times 4$  Build tables on counting stick  	$43 \times 6$ by partitioning <table border="1"><tr><td>x</td><td>40</td><td>3</td></tr><tr><td>6</td><td>240</td><td>18</td></tr></table> $43 \times 6 = 240 + 18 = 258$ If I know $4 \times 6 = 24$ then $40 \times 6$ is ten times bigger, $40 \times 60$ is one hundred times bigger. $13 \times 16$ by partitioning  $100 + 30 + 60 + 18 = 208$ Build tables on counting stick 	x	40	3	6	240	18	Grid method linked to formal written method <table border="1"><tr><td>x</td><td>200</td><td>40</td><td>3</td></tr><tr><td>30</td><td>6000</td><td>1200</td><td>90</td></tr><tr><td>6</td><td>1200</td><td>240</td><td>18</td></tr></table> $30 \times 200 = 6000$ $30 \times 40 = 1200$ $30 \times 3 = 90$ $6 \times 200 = 1200$ $6 \times 40 = 240$ $6 \times 3 = 18$ $6000 + 1200 + 90 + 1200 + 240 + 18 = 7290$ If I know $4 \times 6$ then $0.4 \times 6$ is ten times smaller $0.4 \times 60$ is ten times smaller again. 	x	200	40	3	30	6000	1200	90	6	1200	240	18	$\begin{array}{r} 5172 \\ \times 38 \\ \hline 41376 \\ + 155160 \\ \hline 196536 \\ 1 \end{array}$
x	40	3																						
6	240	18																						
x	200	40	3																					
30	6000	1200	90																					
6	1200	240	18																					
With jottings ... or in your head ....	Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher	Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot. Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental methods	Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers. Recognise and use factor pairs and commutativity in mental calculations	Multiply and divide numbers mentally drawing upon known facts. Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000. Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers establish whether a number up to 100 is prime	Perform mental calculations, including with mixed operations and large numbers																		
Just know it!	Count in multiples of twos, fives and tens	Recall and use x and ÷ facts for the 2, 5 and 10 x tables, including recognising odd and even numbers.	Recall and use x and ÷ facts for the 3, 4 and 8 times tables.	Recall x and ÷ facts for x tables up to 12 x 12.	Recall prime numbers up to 19 know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers. Recognise and use square numbers and cube numbers, and the notation for squared (²) and cubed (³)																			
Year	1	2	3	4	5	6																		
Foundations	Count in 2s	2 x table	Review 2x, 5x and 10x	4x, 8x tables 10 times bigger	4x, 8x tables 100, 1000 times bigger	Multiplication facts up to 12 x 12																		
	Count in 10s	10 x table	4x table	3x, 6x and 12x tables	3x, 6x and 12x tables 10, 100, 1000 times smaller	Partition to multiply mentally																		
	Doubles up to 10	Doubles up to 20 and multiples of 3	Double two digit numbers	Double larger numbers and decimals	Double larger numbers and decimals	Double larger numbers and decimals																		
	Count in 3s	3 x table	8 x table	3x, 9x tables	3x, 9x tables	Multiplication facts up to 12 x 12																		
	Double multiples of 10	Count in 3s	3 x table	11x, 7 x tables	11x, 7 x tables Partition to multiply mentally	Partition to multiply mentally																		
	Count in 2s, 3s and 10s	2 x, 3 x and 10 x tables	6 x table or review others	6x, 12 x tables	6x, 12 x tables	Double larger numbers and decimals																		

# Division

 <p><b>Written Methods</b></p>		<p>Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (<math>\times</math>), division (<math>\div</math>) and equals (=) signs</p>	<p>Write and calculate mathematical statements for <math>\div</math> using the <math>\times</math> tables they know progressing to formal written methods.</p>		<p>Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context</p> <p><math>194 \div 6</math></p> $\begin{array}{r} 32 \\ 6 \overline{)192} \\ 18 \phantom{0} \\ \hline 12 \phantom{0} \\ 12 \phantom{0} \\ \hline 0 \end{array}$ <p><math>192 \div 6 = 32</math></p>	<p>Divide numbers up to 4-digits by a two-digit whole number using the formal written method of short division where appropriate for the context</p> <p><math>564 \div 13</math></p> $\begin{array}{r} 43 \text{ r } 5 \\ 13 \overline{)564} \\ 52 \phantom{0} \\ \hline 44 \phantom{0} \\ 39 \phantom{0} \\ \hline 50 \phantom{0} \\ 39 \phantom{0} \\ \hline 110 \\ 78 \phantom{0} \\ \hline 320 \\ 260 \phantom{0} \\ \hline 60 \end{array}$ <p>Using known multiplication facts</p>
